#### InfraWare, Inc.

# How to verify digitally signed documents

The PDF document you have is digitally signed. Electronic signatures are a new technology that guarantee that computer files have been created by the signer and that their contents have not been tampered with. To make confirmation of the validity of the electronic signature, please follow instructions below. 🛴 Infra Ware, Inc. 🖵

# Why, this configuration?

We use a technology equivalent to a handwritten signature called a "electronic certificate". Certificate is issued by GMO GlobalSign K.K. after strict identification of the signer, called 1-2-3 certificate. 1-2-3 is a "public certificate" certified by CA/Browser forum, and it's root is pre-installed on Windows, Chrome and other major OS and browsers. The settings enables you to verify signature.
